Receive and store B user's:
- caller groups,
- profiles,
- redirection settings, and
- associations
601
602
Update B user's current profile
603
Wait for call or profile update
604
605
Detect a call to B user
611
Retrieve B user's current profile
612
Identify A user
613
Determine A user's caller group
614
Retrieve redirection settings for B's current profile and A's caller group
615
Redirection settings exist for B's current profile and A's caller group?
616
Yes
No
B's current profile has default redirection settings?
617
Yes
No
619
Process call normally
618
Process call according to redirection settings
